

Founded in 1984, Automatisation JRT Inc. specializes in the field of automation and the manufacturing of control panels.

Our experienced team of engineers and technicians can develop a solution adapted to your needs.

# AUTOMATISATION JRT INC.

DESIGN AND MANUFACTURING  
OF ELEVATOR CONTROLLERS

## ELEVATOR

The **NON-PROPRIETARY** controllers are designed using from programmable logic controllers (Omron std, Allen-Bradley), which have a processor that refreshes the calls every five milliseconds. This type of processor is well-known for its reliability, durability and flexibility, allowing fast and simple programming. All of the controller's components are available at **Automatisation JRT Inc.** or at a local distributor.

### Technical support 24/7

Our qualified technicians assure you continuous support night and weekend.

**One of our strengths** is to design and manufacture controllers which meet **your requirements**.

### AVAILABLE CONTROLLERS:

- Handicap lifts, JHA series
- Dumbwaiter, JDW series
- Residential, JRD series
- Hydraulic, JHD series
- Hydraulic limited-use, JLL series
- Rescupower, J-RESCU series
- 1 - 2 AC speed, J12 series
- VV motor-generator, JVV series
- VVVF AC variable frequency, JVF series
- SCR DC variable speed, JSC series
- Escalator, JEC series
- Dispatcher, JDP series
- Monitoring system, J-MON series
- Overlay temporary control, JOV series

## Our company has four other divisions, all located within the same facility

### INDUSTRIAL

Our multidisciplinary team allows us to quickly and efficiently answer requests from our customers, whether it involves PLC programming, a human-machine interface, or variable speed drives in various industries such as water treatment, wood transformation, HVAC equipment, food and beverage, textile, etc.

### INDUSTRIAL COMPUTING

Our innovative team of industrial computing technicians can design and integrate custom-made software to answer your supervision and control needs. Whether you are developing a new system or upgrading an already existing system, we will meet your requirements.

### ROBOTICS

With the continuous cost reduction of the industrial robots, the technology is now much more affordable for many companies. Due to our large experience with process and factory automation systems, we can integrate robotic solutions for all kinds of processes used in your particular industry.

### SALES AND DISTRIBUTION

Business agreements with our suppliers are based on mutual trust and respect. Our purchasing power allows us to receive better support and the best price/quality ratio. Our team will give you an excellent service by answering quickly to your requests and by offering you high quality technical support.
