

A car tailored to your needs

At MP Lifts, we want to make your life easier. That's why we provide you with all the tools necessary for the design of your car to be a perfect fit with the design of your building. No more restrictions, no more looking though lots of options and models which don't fit in with your designs.

Now all you have to do is choose a car range and then design your car. You can choose from our many finishes and combine them as you want.

The car of your imagination, within your reach

MP CarDesigner

**You yourself design the car for your lift

We present you with a new tool with infinite possibilities

Now, configuring and viewing the car you want will be very simple.

We provide you with everything you need to design a car tailored to your needs.

The new range of MP CARevolution cars allows you to quickly and intuitively customise the various finishes available, view the configuration chosen, save, print, send by email and ask for more information on the resulting car.

An online tool which can be run on any web browser or mobile or desktop device and is optimised for use on tablets.

Wherever and whenever you want

The Revolution of Ecodesign

NATURALLY tailored to all styles

Life-cycle assessment, applying ISO standards 14040-14044 and CML-2001 and Eco-indicator methods

Minimum environmental impact

Use of 100% recyclable material

We have used the most up-to-date ECODESIGN methods available on the market for the new MP CARevolution passenger car, right from the conceptual design phase.

For this purpose, a rigorous and detailed life-cycle assessment has been done, applying ISO standards 14040-14044 (in its compulsory phase) and methods CML-2001 and Eco-indicator 99 (in its optional phases).

The result of this process is a product with minimum environmental impact, this being supported by the use of materials which completely respect the environment and are 100% recyclable, the optimisation and simplification of manufacturing processes, the use of highly efficient lighting and signalling technology and a significant optimisation in terms of its weight, this directly bringing about a reduction in energy consumption by the lift over its service life.

Eco-efficient design tailored to your needs

Assembly and maintenance made easier

FLOORING

Greater regulation during construction, meaning adaptation to any lift shaft.

Hinged OPERATING PANEL

which can be easily accessed for maintenance work.

LED LIGHTING with a two-year guaranteed service life, meaning less maintenance work.

WALL PANELS

Optimisation of assembly times thanks to a reduction in weight and to new fixtures.

Integration with

MP ecoGO CONTROLLER. Pre-wired and with plug, making connecting the lighting easier.

Countless advantages for users

LESS NOISE inside the car thanks to vibroacoustic car wall panels.

OPTIMISATION OF THE USEFUL **HEIGHT INSIDE THE CAR** thanks to new lighting concepts.

LESS NOISE inside the car, meaning greater comfort.

MORE INFORMATION FOR USERS thanks to the TFT display.

OPTIMISATION OF THE CAR'S USEFUL AREA. Reduction in the thickness of walls.
